

I am <Name>, the <Designation>, also the <Subject Professor> of Mr. Lal Bihari Pandey at Jamia Millia Islamia. He has been in my close contact academically and through club activities.

In the period that I have known Mr. Lal Bihari Pandey, I have found him to be focused, active and enthusiastic about coding. He has shown meticulous enterprise in his studies. He remains eager to learn and has commendable ability to grasp new concepts. This is reflected in his report card.

Mr. Lal Bihari has been an active member of prestigious clubs where he is found conscientious. He organized 50 days long Coding Contest. He has been leading two Android teams at IEEE JMI CS and Google Developer Student Club. He is facilitating (teaching and managing) the Compose Camp for Android.

His team won the Smart India Hackathon 2022, organized by Govt. of India by building a cross platform (Android and IOS) application using Flutter and Firebase.

He landed himself an internship at Mugs where he worked on building an android application using Kotlin and Firebase.

Such students should be helped and encouraged to excel and achieve new heights. His enthusiasm and skills make me highly recommend him for Mitacs Globalink Research Internship.
